IT

SECURITY ENGINEER

Freelancer, 25 to 40 h per week · Remote

Xorbit is a software company from Vienna. Our product family, MeetinX for video meetings and BookinX for online booking, is built for companies that value quality, design and simplicity. We work fully remote, as one international team, and give every person real ownership from day one.

Security and privacy come first for us. You make sure MeetinX and BookinX stay safe for every company that trusts us with its meetings.

MAIN RESPONSIBILITIES

- Run penetration tests and security reviews
- Harden servers, containers and applications
- Monitor, detect and respond to incidents
- Support GDPR and compliance work

QUALIFICATIONS AND SKILLS

- 3+ years in application or infrastructure security
- Knowledge of OWASP, TLS and authentication
- Certifications such as OSCP are a plus
- English C1

REMUNERATION
